*Decisions, decisions. We can make the perfect window fashion, but only you can choose the perfect color. And Silhouette window shadings offer a variety of soft hues; even the headrail is color coordinated. When fully raised, your window shadings are concealed behind them, so you can make the most of your outside views. So whatever your fashion requirements, Silhouette window shadings are designed to cover them all beautifully.*

There is only one window treatment that affords you so much control over light. It's Silhouette® window shadings. So just as you would style a room with quality furniture and art, Silhouette shadings let you style a room with the planet's most abundant design element – sunlight. Here's how. Soft fabric vanes suspended between two sheer panels allow you to create an endless variety of moods. Just tilt the vanes to let in the precise amount of light you desire.

Fully open, the vanes appear to float, with no visible cords to interrupt your view or limit the light. Fully closed, the shadings shut out the view and dim the light. Silhouette® shadings come in two vane sizes – traditional two-inch or a bolder three-inch vane offering superior view-through. No other window treatment offers more ways to control light, with fabrics that range from semi-sheer to light dimming, and a seemingly endless range of colors.

Magical – The Matisse Collection™ of colored sheers magically transforms an entire room with a dramatic cascade of color.

At Hunter Douglas, we stand behind our products. Each comes with a lifetime limited warranty, and is designed with safety in mind.
